

ZAPP-Air Circular no. 6

March 2023

Content:

- **ATLAS AES Release 3.0 – presentations in the one-step AES procedure**
- **Changed interface descriptions**

The ZAPP-Air Circular no. 6 provides information about planned changes in the web application Air@Gate and the related interfaces FWB, FHL and FSU.

These are mandatory adjustments for commissioning at the end of June 2023!

1. ATLAS AES Release 3.0 – presentations in the one-step AES procedure

With the ATLAS AES Release 3. AES presentations for the one-step AES procedure must be declared with the Local Reference Number (LRN) instead of the MRN.

This means that additional information is required in the FWB (Master-AWB) and FHL (House-AWB) interfaces or is reported back to the participant with the FSU (status).

1. Local Reference Number (LRN) of export declaration
2. Consignor / exporter zur LRN (alternative to representative / declarant)
3. Representative / declarant to LRN (alternative to consignor / exporter)
4. New status codes in ATLAS response messages

2. Changed interface descriptions

The changed interface descriptions (version 1.6) can be found here

German:

<https://www.dakosy.de/support/dokumentation-fuer-entwickler/schnittstellen-customs#c12178>

English:

<https://www.dakosy.de/en/support/documentation-for-developers/interfaces-customs#c12178>

The changes to the MRN/LRN are explained in the ATLAS Teilnehmerinfo 0306/22 - section 8 . The link to the document can be found here:

[ATLAS-Teilnehmerinfo 0306/22.](#)

We will inform you about the exact schedule, when the changes will be available in test and production, in another ZAPP-Air newsletter.
