

ZODIAK GE Customs software

**Transparent and efficient Customs handling
throughout Europe**

ZODIAK GE

Transparent and efficient Customs handling throughout Europe

The differing Customs regulations and procedures throughout Europe and worldwide create a huge challenge for all economic players. Many internationally-operating businesses and logistics service providers attempt to use unique solutions or individually-created software. Due to rapidly changing regulations, these must be constantly upgraded and maintained, usually at short notice. Such solutions usually prove to be not only time-consuming but also expensive.

The ZODIAK GE Customs solution works through this issue by offering a standardized interface with many European Customs agencies as well as other public authorities and institutions, reducing complexity while still offering a wide range of functions.

ZODIAK GE – for your Customs handling

ZODIAK GE is certified for the procedures in Germany, Switzerland, Austria, the Netherlands and Belgium as well as for the European EMCS and ICS processes. This enables the ZODIAK GE customers to process their data exchange electronically and largely automated with the Customs authorities.

The customer can decide on the levels of data and process integration. Internal procedures can be optimized while also closing gaps in communication with Customs.

Our modern, java-based ZODIAK GE Customs software has intuitive and user-friendly interfaces and can be used across the borders of many EU countries.

Thanks to its modular principle, every customer is free to decide which Customs procedure modules are suited to their needs. ZODIAK GE offers an outstanding range of functions and services, and with more than 1,500 customers is one of the market leaders in this field.

ZODIAK GE – at a glance

Certified for customs handling in:

- > Germany
- > Belgium
- > Netherlands
- > Austria
- > Switzerland

Customs handling support:

- > Export
- > Import
- > NCTS
- > Customs warehouse

Additional modules:

- > Integrated electronic Customs tariff
- > Preliminary cost estimate for import duties
- > Integrated compliance check
- > Bond management
- > Fiscal representation
- > Invoicing module
- > Electronic archive (e-file)

Interfaces:

- > BOX Interface for data integration into any ERP system
- > eBOXer (XML / CSV)

As part of the DAKOSY GE family, ZODIAK GE can be combined with the logistics solutions CargoSoft GE (Transport Management System) and UNIKAT GE (Truck, Rail Intermodal). Using these software packages together allows you to optimize all your logistics processes.

ZODIAK-EMCS

The EMCS (Excise Movement and Control System) IT process is designed for all enterprises which transport excise duty goods within the EU under suspended duty arrangements. This applies to all companies dealing in beer, spirits, spirit-containing products, energy products and tobacco goods. The delivery of the paper form (accompanying administrative document) is generally not permitted, the filing must be made via EMCS in the form of an electronic document.

With ZODIAK-EMCS, DAKOSY offers a comprehensive and convenient solution. Both a web application and an EDI platform are available, which the customer may choose to use separately or to combine to fit their needs.

ZODIAK-ICS/ECS

The IT procedures ICS/ECS (also known as Import or Export SumA) are mandatory throughout Europe. For goods imported into the EU, the so-called Import SumA must be sent to Customs authorities upon the first arrival of goods at the EU Customs border. Customs conducts a risk analysis in order to identify threats to the security of the EU and carry out preventative measures, if necessary.

ZODIAK-ICS/ECS is available as an EDI platform or as a SaaS (web) solution for ICS registration in all EU countries – whether you transport goods in the EU by air, by sea or by road. Both solutions deliver the entire ICS process (Import SumA, change declaration, redirect and arrival notices).

ZODIAK-EMCS and ZODIAK-ICS/ECS: The advantages, at a glance

- > **Using the web solution makes the purchase of expensive software unnecessary**
- > **No need for in-house development or certification**
- > **No need to build an elaborate individual connection to national Customs data centers**
- > **One solution/one contact point for all EU member states**
- > **Flexible solution: web app and EDI interface can be used separately or parallel**
- > **Can be integrated into your in-house system using a defined EDI interface**
- > **Fallback web app available at all times, regardless of location, without installation on a PC**
- > **Workflow inspector with extensive status messages – which also provides warning messages if necessary steps are omitted**
- > **Also available as app (ZODIAK-ICS/ECS only)**
- > **Customer service around the clock (24/7)**

WE DIGITIZE LOGISTICS!

We have been dedicated to the success of our work for several decades. We offer communication, IT and software solutions based on the latest technology. DAKOSY was founded in 1982 as a data communication system for the Port of Hamburg, where the roots of our company run deep.

Customers from Hamburg, Germany, throughout Europe and around the whole world use DAKOSY. Regardless of location or hub, our services and applications support over 2,500 companies from the transport and logistics sector in carrying out their challenging tasks. Every day, more than one million transactions are communicated through our state-of-the-art data centers.

If you have questions or would like more information about DAKOSY AG, our services and solutions, please feel free to contact us at any time.

We're looking forward to communicating with you.
