

Components which have changed with PrimeFaces:

Lists:

With the new PrimeFaces Release the configuration of table has changed:

Toggeling the columns can now be achieved threw a central icon. In each table which is configurable, there is a new column, containing the central icon, which leads to overview of columns which are toggable:

Sorting can be done by the arrows marked red.

The columns order can be configured by drag and drop.

ATB status	ATB no.
FCL	ATB155066724001995872

Also, all tables are now displayed over the whole screen

The pagination can now be found at the bottom left of each table.

Date fields:

All date fields can now be filled by keyboard. If so, you have to stick to the displayed pattern (red)

ETA from

You can also pick the date over the calendar (blue). If time is required, you can configure it by using the sliders at the bottom:

If time is necessary, the pattern in the date field, will hint time values:

September 2017

Su	Mo	Tu	We	Th	Fr	Sa
					1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30

Now Done

Picklists:

The buttons' functions are now displayed via tooltip, not in the buttons themselves:

Info- and error panels:

The layout of the message panels is now shown in a more dominant way:

File upload:

File uploads have changed in layout and in functionality. Unlike with the old upload, you have to search your file first, then click upload. The files you have chosen to upload are listed below the upload, and can also be deleted:
