

Newsletter No. 01/2018

4th January 2018

Contents

Information for terminals

- Overview of import instructions for terminals

Information for freight forwarders

- Master data list of storage location key
- Modifications when entering the storage key (import instructions)

Scheduling overview

- Summary of IMP relevant dates

The newsletter 01/2018 provides information about changes and new functionalities in the Import Message Platform. The software changes for the IMP release 6.10.0 became active with the maintenance work during the night of 10.01.2018. The software changes described below do not affect existing interfaces.

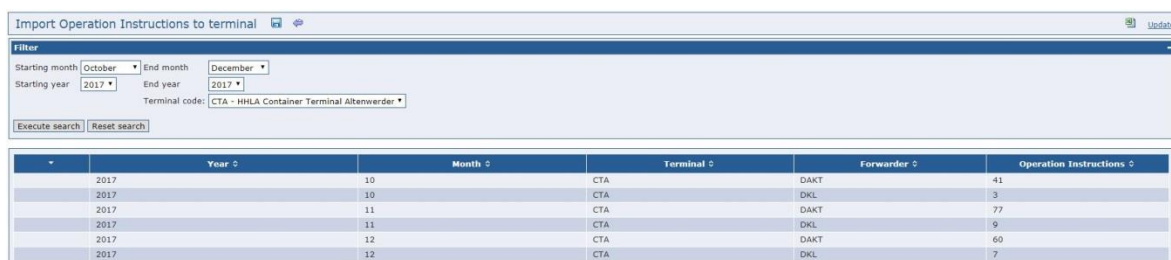

Information and implementation guides can be found at <http://www.imp-hamburg.de>.
The application IMP-Direct can be reached at <http://www.imp-direct.de>.

A complete inventory of fixed bugs and smaller enhancements can be found in the release-notes via IMP-Direct, which can be found in the menu “Help/Release-Notes”

Information for terminals

- Overview of import instructions for terminals

As of now you will find an overview including all import operations instructions which have been assigned and sent to your terminal. You can also select all import instructions within a specific timeframe and download the results as Excel file.

Year	Month	Terminal	Forwarder	Operation Instructions
2017	10	CTA	DAKT	41
2017	10	CTA	DKL	3
2017	11	CTA	DAKT	77
2017	11	CTA	DKL	9
2017	12	CTA	DAKT	60
2017	12	CTA	DKL	7

Information for freight forwarders

▪ Master data list of storage location key

The sub menu "Storage key" has been added under the menu „Administration“.

In the future the freight forwarder's storage location keys can be administered here. By opening the menu „List“ you can view, edit and delete all existing storage keys.

Storage key

Filter

Forwarder (code):
Storage key:

Description:

▼	Forwarder (code) ⇅	Storage key ⇅	Description ⇅	Active? ⇅	Actions
	DAKT	01	CTA	yes	  
	DAKT	02	CTB	yes	  
	DAKT	03	EUR	yes	  
	DAKT	1	CTT	yes	  
	DAKT	11	EUR2	yes	  

Image 2 – List of storage keys

By opening the menu „Create“ you can enter new storage keys. The field forwarder (code) is automatically filled.

▪ Modifications when entering the storage key (import instructions)

As of now you have to choose a key, deposited in the storage key list, via the drop-down menu when creating a new import operation instruction:

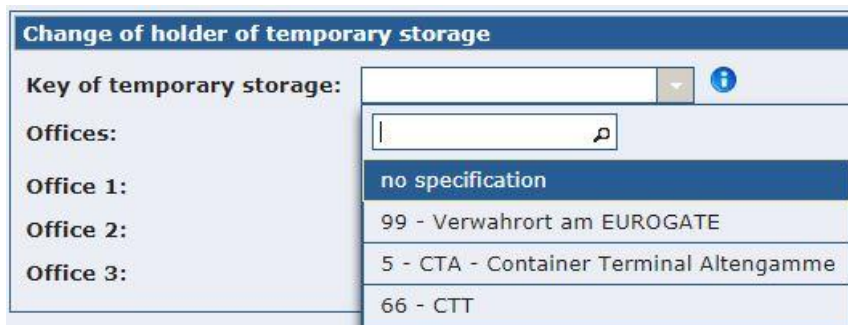

Image 4 – Creation of storage location key

The manual input is no longer available. In addition you can search storage location keys or descriptions by choosing the first entry „no specification“ of the drop-down menu. The search also only includes entries which have been deposited in the storage key list before.

The entry of the storage location key remains optional. If you do not enter a storage location, the system automatically chooses the default value, defined for the participant, in case of change of holder of temporary storage.
