Content

Information for freight forwarders and importers

- Customs declarant in import information itemized report
- Customs declarant in StatusRequest statistics
- ImportInformation message extended by empty container depot for desired return

Information for carriers

- Status 927 confirmed by veterinary office

Scheduling overview

- Summary of IMP relevant dates

The newsletter 07/2018 provides information about changes and new functionalities in the Import Message Platform. The software changes for the IMP release 7.4.0 became active with the maintenance work during the night of 27.06.2018. The software changes described below do not affect existing interfaces.

Information and implementation guides can be found at <http://www.imp-hamburg.de>.
The application IMP-Direct can be reached at <http://www.imp-direct.de>.

A complete inventory of fixed bugs and smaller enhancements can be found in the release-notes via IMP-Direct, which can be found in the menu "Help/Release-Notes"

Information for freight forwarders and importers

▪ Customs declarant in import information itemized report

A new column "Customs declarant" has been added to the "import information itemized report" view. This column contains a participant code (customs declarant), which was specified in the order and to which the trigger for the Auto-IMP function was sent. If none was specified, the column is empty.

Import information message extended by empty container depot for desired return

The empty container depot for the desired return can now be specified in the import information message. For this purpose the message has been extended by the following element: "ReturnLocationData". Optionally, the location (e.g. DEHAM), the BIC code of the empty container depot or a free text can be specified.

The interface is extended in preparation. We will inform you in a later newsletter as soon as the data is passed on to other participants.

Information for carriers

▪ Status 927 confirmed by veterinary office

In the "Veterinary relevant manifests" and "Veterinary relevant equipments for repositioning" lists, the VEA-status "927" and whether it has also been confirmed by the veterinary office are now displayed in a tooltip. In the first step, the status is generated by the IMP using the HS code from the import manifest.

Days since LOI	Actual loading	Gate-Out	Gate-In	Match (Exp.)	VEA status	Actions
	-	-	-	-	927
