

Newsletter No. 08/2018

31st July 2018

Contents

General information

- **Subject line within email concerning status 914 was extended**

Scheduling overview

- **Summary of IMP relevant dates**

The newsletter 08/2018 provides information about changes and new functionalities in the Import Message Platform. The software changes for the IMP release 7.5.0 become active with the maintenance work during the night of 01.08.2018. The software changes described below do not affect existing interfaces.

Information and implementation guides can be found at <http://www.imp-hamburg.de>.
The application IMP-Direct can be reached at <http://www.imp-direct.de>.

A complete inventory of fixed bugs and smaller enhancements can be found in the release-notes via IMP-Direct, which can be found in the menu “Help/Release-Notes”

General information

- **Subject line within email concerning status 914 was extended**

If a container has not been taken into custody after two hours, IMP generates status 914 („Discharge without custody“) which can have two specifications:

- The attempt to confirm an **early** ATB failed, the email subject line contains the corresponding ATB no.
- An ATB was not available during the discharge of the container. The email does not contain an ATB no.

The email subject line was extended by the text „without ATB“ in order to differentiate this error situations better. Please keep in mind that you will only receive this email, if you have activated the corresponding function within the email configuration.
