

ZAPP-Circular no. 44

Content

1. **Date of the ZAPP changeover from AES 2.4 to AES 3.0**
2. **Testing of the new message formats**

With the ZAPP Circular no. 44 we would like to update you with information concerning the changeover of ZAPP to ATLAS AES release 3.0.

1. **Date of the ZAPP changeover from AES 2.4 to AES 3.0**

The changeover date has been planned newly. The ZAPP changeover from AES 2.4 to AES 3.0 will take place on **14./15.10.2023**.

As from this date, HDS/GM01 messages can be sent in the new format. One-stage AES Procedures have to be declared with the Local Reference Number (LRN) instead of the MRN.

Details to the new format have already been communicated in [ZAPP circular no. 41](#).

2. **Testing of the new message formats**

The updated HDS/GM01 messages can be sent with test indicator to DAKOSY from now on. This allows the proper processing of the messages to be verified.

Process tests for the AES 3.0 process cannot yet be offered.

Please contact the [DAKOSY Support](#) if you have any further questions.
