

## ZAPP-Circular no. 46

---

### Content

1. **New Date for the ZAPP changeover from AES 2.4 to AES 3.0**
2. **Transmission of one-stage AES procedures with LRN**
3. **HDS/GM01 transaction transmitted before 23.08.2023**

With the ZAPP Circular no. 46 we would like to update you with information concerning the changeover of ZAPP to ATLAS AES release 3.0.

### 1. New Date for the ZAPP changeover from AES 2.4 to AES 3.0

The ZAPP changeover from AES 2.4 to AES 3.0 will take place on **04./05.11.2023**. During the night between the 04. and the 05.11.2023 ZAPP will probably not be available from Saturday 6 p.m. until Sunday at 1 a.m.

### 2. Transmission of one-stage AES procedures with LRN

As from 05.11.2023, HDS/GM01 messages can be sent in the new format. One-stage AES procedures have to be declared with the Local Reference Number (LRN) instead of the MRN.

Details to the new format have already been communicated in [ZAPP circular no. 41](#).

The Local Reference Number (LRN) only becomes unique with the EORI/branch of the consignor/exporter or the representative.

When declaring a one-stage procedure in ZAPP the EORI/branch of the consignor/exporter or the representative must be specified as in the original AES declaration. If the one-stage procedure has been declared with the representative, then the EORI/branch of the representative shall also be transmitted in the HDS/GM01. If the representative is not named, then the consignor's/exporter's EORI/branch should be transmitted in the HDS/GM01.

As the process of the one-step procedure with LRN is new for all parties involved, intensive monitoring of the processes is requested.

### 3. HDS/GM01 transactions transmitted before 23.08.2023

In order to avoid unnecessary support cases, it is requested that transactions which are no longer required, in particular from the period before 23.08.2023, be cancelled if possible.
