

ZAPP Circular no. 29

September 2011

Content:

- **Changes in the interfaces HDS, GM01 and GPO**
- **Update of ZAPP input rules**

The ZAPP circular no. 29 provides information about changes concerning the ZAPP application, compiled and agreed by the ZAPP working group. They essentially relate to the declaration type MIT (re-export notification) and the information to be introduced there. The focus at the data collection will be more on the issue how the appendix 30A data, relevant for the risk analysis, has been transmitted. Please also note the revised ZAPP input rules, which provide support during the registration of your ZAPP application.

The implementation guides for the modifications described in the following can be found on our homepage www.dakosy.de or at www.zapp-hamburg.de.

Changes in the interfaces HDS, GM01 und GPO

General changes:

- The fields „Note stamp“ (HDS field no. 135), Feld-Nr 135), „Value > 3000 EUR“ (field 142), „GVDE (joint veterinary document for import) available“ (field 144), Joint veterinary document for import (GVDE) (field 145) and „Exempt from presenting the AKM (export control notification) (field 149) are omitted.
- The declaration is being rejected if the consignment description (field 132) only includes one character.
- The email address of the issuer / collector becomes a mandatory field.

Changes for declaration type MIT. Please also note the represented information range of declaration type MIT, included in the annex of this circular:

- The specification of the ATB no. (field 152) is required in case of presentation points located outside of the freezone. The incoming data is being examined accordingly.
- The field „Reference of the entry summary declaration“ (field 153) is being renamed in „Reference annex 30A-data“, since it can be used to explain with which proceeding (entry summary declaration, transit procedure or export procedure) the annex 30A-data has been transmitted. Moreover the export declaration has been added to the list of possible proceedings.
- The specification of the type and reference of the annex 30A-data (field 153) becomes a mandatory field.

ZAPP Circular no. 29

September 2011

- If a reference of a cancellation procedure (masterticket no.) is being used, it must clearly be pointed out that it refers to a cancellation procedure. Herefore the corresponding character „S“ must be set in the sub chapter to field 153.
- The „Reasons for the exemption of the delivery of an exit summary declaration“ (field 154) have been revised. Please note the information provided in the input rules, given below.
- The specification of the character of the article is being omitted for the exemption reason „2“ (Exemption case according to article 592a character ZK-DVO). The mentioning of the exemption reason is sufficient. Moreover references (MRN from the entry summary declaration, transmission procedure or export procedure) do not have to be stated in the exemption reason anymore. The specification of a MRN, possibly at hand, is already been given in the „Reference annex 30A-data“ (field 153).

Changes for declaration type DUX:

- The specification of the country of dispatch becomes optional.

Update of ZAPP input rules

The ZAPP input rules have been revised and updated at www.zapp-hamburg.de. Please note, that they consist of two documents:

- the binding input rules:
http://www.dakosy.de/fileadmin/user_upload/Loesungen/Zoll/Eingaberegeln/20130104_zapp_eingaberegeln.pdf and
- the document (Re-export notifications“:
http://www.dakosy.de/fileadmin/user_upload/Loesungen/Zoll/Eingaberegeln/Wiederausfuhrmitteilung_20120102.pdf

Following items have been changed:

- Carnet ATA are now to be collected under MIT (previously SBF)
- In case of a re-export of the freezone the submission of a re-export notification (procedure 3178) is not necessary anymore (cf. comments under DUX, page 35, last section). This amendment is based on the last modification of the Foreign Trade Regulations, with which § 16b sentence 2 has been deleted.
- The description to MIT has been shortened. Additional information to declaration type MIT has been excluded into the document „Re-export notification“.

Dates

Following dates apply for the changes, described above:

ZAPP Circular no. 29

September 2011

Availability in the test system: 17.10.2011
Implementation in the production system: 01.12.2011

ZAPP Circular no. 29

September 2011

Information range of declaration type MIT (notification)

Required specification for the notification according to article 841a section 2 ZK-DVO:

Update: 22.09.2011

<i>Value</i>	<i>Field description</i>
<i>M = MANDATORY K = OPTIONAL</i>	
M	Place/ location where the goods are situated in the port
M	Name of the issuing company
M	Name of the ZAPP-issuer
M	Phone no. of the ZAPP-issuer
K	Fax no. of the ZAPP-issuer
M	Email address of the ZAPP-issuer
M	Reference of forwarding agency
M	Positions
M	Consignor
M	Consignee
M	Company, delivering the notification
M	Country of dispatch
M	Country of destination
M	Consignment description (container no.)
M	Number of packages
M	Commodity description
M	Gross weight
M	Name of the vessel

ZAPP Circular no. 29

September 2011

<i>Value</i>	<i>Field description</i>
<i>M = MANDATORY K = OPTIONAL</i>	
M	Date of departure
M	Port of dispatch
M	Annex 30A-data has been transmitted with ☐ separate entry summary declaration ☐ transit declaration ☐ export declaration ☐ not at hand (has not been required) under ☐ MRN ____ ☐ other (cancellation / fallback procedure) _____
M/K	Registration no. of the summary declaration (ATB no.) _____
M	Reason for the exemption of submitting an exit summary declaration: ¹ ☐ Goods did not remain in the Port of Hamburg for more than 14 days and the place of destination and the consignee were not modified; entry and exit in Hamburg via vessel ☐ Exemption case according to article 592a character ZK-DVO ☐ Country of destination is Norway ☐ Export procedure has already been completed before the arrival in Hamburg (delivery from landside (truck/train)), annex 30A-data is included ☐ Transit declaration at hand in electronic form, annex 30A-data included in the transit declaration

¹ In dieser Darstellung können nur Stichpunkte genannt werden. Für die richtige Auswahl der Befreiungsgrundes sind weitere Kriterien zu berücksichtigen, die in der aktuellen Version des Dokuments „[Ausnahmen von der Verpflichtung zur Abgabe einer summarischen Ausgangsanmeldung für über den Hafen Hamburg verladene Waren](#)“ auf www.zapp-hamburg.de unter „ZAPP-Eingaberegeln“ beschrieben sind.
